CoCon Signage

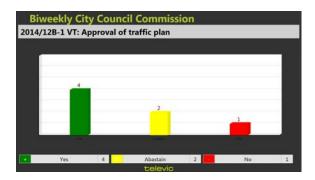

Description

CoCon is a software suite for conference management & assistance, that opens up a host of options and configuration setting to control every aspect of the meeting experience. CoCon is connected to a central conference unit that controls a number of microphones and other conference equipment. The software interacts with the central conference unit to enable various functionalities and views on the conference. That is why CoCon is conceived as a client-server framework. The CoCon Discussion Module serves as the base of the suite and is needed to run other plugin modules.

CoCon Signage Application [Client-side]

CoCon Signage is the display application within the CoCon suite. It is a plugin for CoCon Discussion. (CoCon Discussion required to run CoCon signage). CoCon signage can be used to display information automatically to the delegates

in the room using large screens or a projector. The CoCon Signage license determines the number of signage screens that can be active simultaneously.
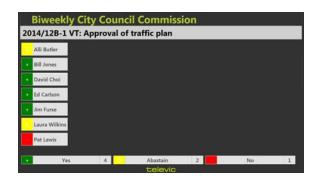

Features

CoCon Signage Displays:

- Title of the meeting
- Meeting timer
- Speaker list
- Delegate speech timers
- Group list
- Group speech timers
- A synoptic view of the room with microphone activity
- An agenda with the current agenda item
- Voting results (Pie chart, Bar chart, etc.)
- Nominative lists, voting synoptic

System Requirements

Hardware Requirements

Room Server

- Processor: Intel i5 2 GHz or higher.
- RAM: minimum 4 GB
- Free disk space: minimum 10 GB
- Network connectivity: at least 100 MB/s

Client Applications

- Processor: Intel® Dual-Core 2 GHz or higher
- RAM: Minimum 4 GB.
- Recommended GPU: supporting DirectX 9.0 or better
- Free disk space: Minimum 10 GB
- Network connectivity: at least 100 MB/s

Network requirements for Central Units connecting over TCP/IP:

- Available bandwidth of at least 100 Mb/s for each CoCon Room server/Central Unit connection

Software Requirements:

- Windows 7
- Windows 8
- Windows 10

Each PC installed with a CoCon component (any server or client application) requires the .Net Framework 4.5. This will be installed automatically when CoCon is being installed.
